

Less searching. More moving forward.

Bring your files, business data and document processes together. Find what matters, reduce manual entry and keep decisions moving.

Narra product views shown with sample data.

- **Capture and find in one place**

Upload, email or scan files into Narra. Organize Spaces and Library folders, then search document text, tags and metadata.

- **Move from review to done**

Automate filing and approvals. Build forms with AI, route responses and collect multiple electronic signatures on PDFs.

- **Review and revise with confidence**

Highlight PDFs, add notes and save new versions. Keep reviewer instructions and decisions connected to the version reviewed.

- **Put AI to work on your documents**

Use OCR, AI summaries and Smart Extract to turn documents into searchable text and structured business information.

- **Stay in control as you grow**

Protect records with permissions, MFA, retention and legal holds. Share files through expiring, revocable links.

- **See work clearly across your team**

Bring teams together with Dashboards. Track document inventory and workflow activity, then export reports to CSV.

Affordable plans. Room to grow.

Choose the plan and seats your team needs. Bring document management, AI and workflow tools together to reduce manual work and simplify your software stack.
